Projector Mounts

PCM 240

Projector Drop Ceiling Mount

Included accessories

DESCRIPTION

The Extron **PCM 240** Projector Drop Ceiling Mount is a versatile ceiling plate designed as a time- and cost-effective means of integrating a projector up to 50 pounds into small boardrooms and classrooms with suspended ceilings. The 18-gauge steel (25.8" L x 8.00" W x 1.15" D) mount can be quickly installed anywhere there is a suspended T-grid incorporating 2' x 2' (60 cm x 60 cm) or 2' x 4' (60 cm x 120 cm) ceiling tiles. The PCM 240 includes knockout openings for one single-space junction box and one double-space junction box — RACO #8471 recommended — which provide integrated power access points or for use as video connection/cable pass-throughs. One threaded pipe adapter (1.5" NPT) is provided for mounting projector mount poles. A dual slot design for the pipe adapter maintains increased rigidity while providing precise yet ample adjustment and positioning. The PCM 240 is designed to be suspended from the structural ceiling above the suspended ceiling tile using the included turnbuckles and 60' tie-wire safety cable or optional threaded rods - not included. Once securely mounted, the PCM 240 can be fixed to the T-grid using the supplied PEM inserts and screws. Available in white only.

MODEL	VERSION DESCRIPTION	PART #
PCM 240	1.5" NPT Adapter Plate	60-772-03
